

Every one's a winner!

Your customers win - with a high quality affordable spraybooth, lower energy costs, faster process times and increased capacity!

You win - with delighted customers and increased paint business

Colourbox - now better than ever

Colourbox is already a proven winner with Bodyshops throughout the UK. Now, with new features that deliver real energy savings and productivity improvements, Colourbox is better than ever.

Quality engineering, outstanding reliability, competitive prices and low running costs, come as standard with all Colourbox spraybooth ovens. For smaller Bodyshops and franchised dealers alike, Colourbox offers outstanding value for money and an affordable way to invest in a new booth and comply with the 2007 paint directive.

But that's not all. By specifying one or more innovative extras, your customers can take their spraybooth productivity and profits to new heights.

Fitted with the optional Fuel Saver (FS) mode or Junair's renowned QADs auxiliary air moving system, Colourbox offers an unbeatable solution for vehicle refinishers.

“ We have no hesitation in recommending Colourbox to our customers - it's a quality product with an excellent track-record! ”

Andy Lovett, Rigby Taylor Paints

“ One Bodyshop we supply installed Colourbox six months ago - since then, our paint business with that customer has doubled! ”

Terry Hamblin, Premier Paints

Why Colourbox?

- Exceptional air handling plant performance
- High airflow, low noise from direct drive centrifugal fan units
- Strong, durable construction
- Designed for rapid installation and immediate use
- Low running costs - low maintenance
- Choice of cross draught system with chest mounted extraction or down draught ventilation with floor extraction

Why Colourbox with Fuel Saver and QADs?

Fuel Saver is our air handling plant designed specifically to reduce energy consumption and costs. Together with QADs, the market-leading auxiliary air movement system, Colourbox offers a host of powerful benefits for the Bodyshop.

- Rapid return on initial outlay
- Saves up to 68% on energy consumption
- Reduces overall paint drying and curing process times by around 35%
- Faster process times mean extra throughput - extra profit
- Covers the whole vehicle in one operation
- Ensures consistent drying of waterborne base coats and through curing of 2007 compliant top coats
- Not compressed air driven

“ We're delighted with the performance of Colourbox - we've increased our throughput from just one or two vehicles a day to five. ”

Tony Settecasì, AirFlow
